Education

Symbiosis Institute of Computer Studies and Research Pune, Maharashtra
Bachelor of Computer Application, **GPA: 7.37** 2020 - 2023

Experience

Secret MindTech | Full Stack Developer Surat, Gujarat | 2023 - 2024

Developed web applications using MERN Stack, GraphQL, Next.js, and TypeScript.
Collaborated with teams to deliver responsive, scalable, and client-focused solutions.
Integrated APIs, ensured cross-browser compatibility, and optimized performance.
Troubleshoot and resolved complex issues to maintain seamless functionality.

Skills

Programming Languages:	Javascript, Typescript, HTML/CSS
Frameworks/Libraries:	React, Redux, Expressjs, Nextjs, Nestjs, Restful API, GraphQL
Tools / Platforms:	Git, Github, Docker, Vercel, AWS
Databases:	SQL, NoSQL

Projects

Girls First Finance | Link Nextjs, Express, Sequelize, AWS, Docker

- Developed the admin panel and backend for a mobile application, enhancing administrative controls, functionality, and overall system management.
- Implemented product enhancements to optimize application performance and scalability, collaborating with the team to deliver robust, scalable backend solutions aligned with project growth.

MoneyAtlas | Link Expressjs, Sequelize, Nextjs, Vercel, Docker

- Developed full-stack features to enhance MoneyAtlas' financial comparison platform, improving user experience, functionality, and seamless user interactions.
- Integrated data APIs to ensure accurate product comparisons, optimizing platform performance for scalability and high traffic.

Analytics Linker | Link Reactjs, Nodejs, Expressjs, MongoDB

- Developed and optimized APIs integrating Meta Ads API to automate UTM tagging and streamline ad campaign tracking across multiple platforms.
- Created frontend for enhancing user experience and seamlessly connecting the UI with backend services in the operational tool.

BullStreet Group | Link React, Tailwind, AWS

- Revamped the BullStreet Group website from a no-code platform to a custom-built solution, enhancing user experience, performance, and scalability through deployment on AWS S3 with CloudFront.
- Automated social media data integration, enabling real-time fetching and display of client social profiles, improving operational efficiency and user engagement.
